

06-23-1985-p.7

the Munson (about whom we talked her son at EAG's); we also straightened out who is who among the Budner. DWP & SRP went out and admired my lily blossom & then I went to my vegetable garden and picked some radishes for DWP & he took his leave -- we washed the radishes in one of my buckets of garden water so that DWP could eat them on the way home in the jeep. I picked some Swiss Chard for my dinner & also some radishes. Very thoughtful of DWP to come by to make sure that I was ok, after having been "brutalized" at lunch. SRP had dinner: a large salad with SRP-grown Swiss Chard, alfalfa and mung bean sprouts; some store-bought leaf lettuce and <sup>olive</sup> oil; cold lapwing sandwich; corns number 2 -- some pancake & SRP-produced maple syrup.

10:20 PM -- Following a very peaceful afternoon and evening, all seem to be well once again. In the course of the afternoon, Hank (often called) (to discuss the filing form for a PA tax number for the CHSM), Howard <sup>called</sup> (to arrange a meeting domain son at his house, during which Howard and I will bring up to date the financial records of the CHSM), & FMW telephoned (to tell me about her trip to Vermont with Marga Barr).

148.00 - organ  
\$840.22

which was a disaster; the seeds did not germinate -- soil too dry & "mean" I believe.

- hoed up / tilled my herb garden out front -- and planted about 40 marigold seedlings in the former herb area; the <sup>marigold</sup> seedlings are from seeds that I picked off of marigolds in the flower boxes in Memorial Park last Fall and were planted by SRP in the area where later the giant marigolds from Mossie are now planted -- I removed the seedlings from under the "giants" and placed them in their own bed, which, with any luck, should be a blaze of color in about three weeks. Also in the former herb garden I planted the two geranium trees that I wintered over from last year & also the Kay Colville geranium (a single plant that she could not make grow and so she gave it to me and it is doing beautifully).
- I moved the <sup>"make plant"</sup> Sansevieria back inside the Church about three weeks ago, and the main plant now has two blossoms on the way, as does the "branch" in a vase in water.
